

# Asphalt Roof Problems?

Leaks?  
Seam Separation?  
Alligatoring?  
Multiple Penetrations?

The ASTEC® Re-Ply™ Roofing System  
**for Asphalt Roofs**

# The ASTEC® Re-Ply™ Roofing System for **Asphalt** Roofs

With hundreds of millions of square feet applied since 1986, ISO 9001 Registration, multiple accreditations, and the highest quality materials... **ASTEC is the right choice.**

*Leaky, failing asphalt substrates are converted to seamless, sustainable cool roofs.*

*Repair substrate and any wet insulation*

*Power wash; seal curbs and penetrations*

*Seal all seams and flashings*

*Apply multiple layers to system specs*

*Maximize cooling efficiencies with ASTEC*

ASTEC® RENEWABLE™ Warranties ensure a sustainable, weatherproof cool roof.

At each Warranty term, ASTEC® RePly™ roofs can be restored to spec and the warranty renewed at a marginal expense.

**10 or 15-Year RENEWABLE™ Warranties for Material AND Labor**

**Turn your old asphalt roof into a weathertight cool roof !**

# ASTEC success and satisfaction — proven since 1986...

Convert failing asphalt roof maintenance headaches  
into sustainable cool roofing — *without costly re-roof!*

Go Re-Ply instead of replacement

←  
By eliminating costly tear-off, disposal, and replacement of this asphalt roof, the owners also avoided business downtime and employee inconvenience — while saving thousands of dollars. They now have renewed the weatherproofing properties and extended the roof's life.

→  
Any roof tops with multiple vents, skylights, piping, HVAC equipment, or walkways are a nightmare for conventional roofing. A durable, fluid-applied ASTEC® Re-Ply™ Roof goes on faster and at far less cost. Curbs, drains, gutters and parapets are monolithically sealed as a seamless, watertight roof.

Go fluid-applied on complex roofs

A roof system to save asphalt

←  
ASTEC has developed a Re-Ply™ System specifically for failing asphalt roofing. This monastery avoided total replacement with selective restoration and fluid-applied Re-Ply™ roofing. They gained a seamless, sustainable cool roof — virtually impervious to ponding water and ultraviolet degradation.

→  
Conditions for this Coast Guard Station can be destructively hot and humid — with plenty of salt corrosion — and powerful tropical storms thrown in. The seamless wind and weather protection of ASTEC® Re-Ply™ roofing is only matched by its unbeatable cool roof advantages

Go cool in the sun

Go renewable before it's too late!

←  
Asphalt can deteriorate beyond restoration. This roof would have failed the ASTEC qualifying inspection in a short time — requiring the high costs and disruptions of full replacement — and losing the seamless stability of renewable ASTEC® Re-Ply™ roofing.

→  
This 140,000 square foot asphalt roof was failing in sections. ASTEC® Re-Ply™ Roofing Systems allow building-by-building, or section-by-section roofing conversions — as needs arise — and budgets permit.

Scheduling by need & budget

Hundreds of millions of square feet applied — Many millions of dollars saved

# ASTEC® also has Re-Ply™ Systems for single-ply, metal, and many other roofing substrates.

Get a free inspection survey of your roof. You, too, could be saving thousands of dollars.

Tear-off and replacement of this EPDM museum roof was to take 4 months plus facility disruptions. ASTEC® Re-Ply™ installation took 6 weeks — with no disposal or interruption headaches — for less than half the cost.

This multi-building metal roof complex is being selectively restored as needs arise. ASTEC® Re-Ply™ Systems permit reroofing of complete facilities or only problem areas, as budgets allow, until total sustainability is achieved.

This concrete roof with a helicopter pad in Kuwait City was cracking in the hot, salt mist climate. ASTEC® Re-Ply™ fluid-applied roofing bonded directly to the restored concrete, producing a single, stable and sustainable new surface.

## Why pay to replace a roof you can Re-Ply?

**FREE ROOF SURVEY**

**1.800.223.8494**

[www.icc-astec.com/survey](http://www.icc-astec.com/survey)

Seamless, sustainable roofing begins with an inspection of your current roof substrate. If your roof qualifies for an ASTEC Re-Ply System; repairs, wet insulation, corrosion, splitting seams, will all be noted in your detailed proposal.

### Re-Ply™ Roofing Systems

Perfecting Fluid-Applied Membranes Since 1986

### Proven roof systems; professionally applied.

Great roofing products are only as good as their application. ASTEC® Re-Ply™ Roofing Systems are only installed by contractors Trained and Authorized by ASTEC to apply the proper Re-Ply™ Roofing System to earn a 10 or 15-Year ASTEC® Renewable™ Warranty...for Materials AND Labor!
